

Flow design with 'Flow Wave' accent ©Silverstone Photography

A wide range of standard or custom finish options are available for ArmourFX panels; ranging from applied polished and textured plaster finishes to 3D sculptural effects. Emulating beautiful natural Travertine stone, urban concrete or highly polished marble, ArmourFX panels are lightweight and do not require specialist mounting or installation.

All panels are provided with finished edges and are ready for hanging. Plaster finishes are applied to MDF; Sculptural pieces are made from non-combustible mineral plaster.

Materials for external panels are available. See table on back cover for further information.

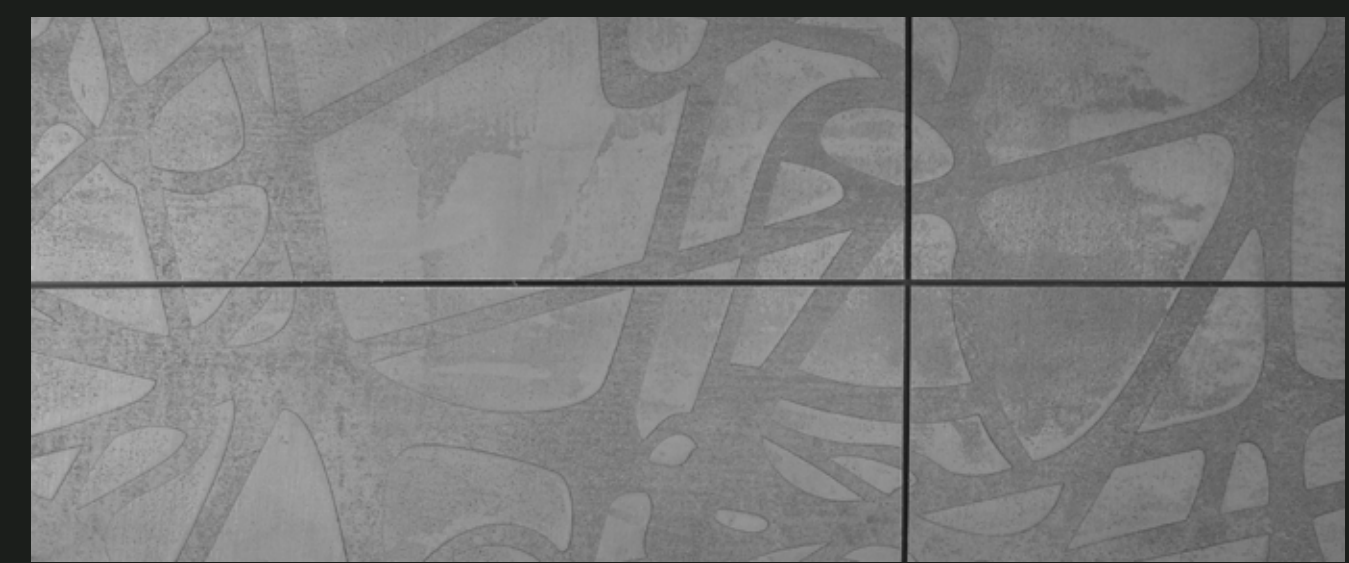

ARMOURFX[®]

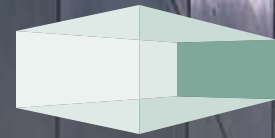

Decorative Wall Panel System

Armourcoat now offer custom-made decorative wall panels, evolved from our renowned range of applied seamless wall finishes – introducing ArmourFX.

Our team of specialist designers and artisan plasterers can work with you to create integrated custom wall panel systems or design statement single artwork pieces. Whether you are looking for a sculptured 3D form, or a creative stencil technique to overlay exquisite hand-applied polished plaster, ArmourFX can provide a unique - but competitively priced – solution.

- Design-led modular wall panel system
- System suitable for any design application, for internal or external use
- Over 360 standard colours and finishes or custom effects and logos
- Flowing non-repeat designs possible for large scale wall applications
- Customised to meet your specific project requirements
- Highly suitable as single feature wall artwork pieces
- Simply hung using 'Z' clips, no specialist installation required

Installation - MDF panel

Where requested ArmourFX panels are supplied pre-fitted with Z-clips to aid on site installation by your joiner. Z-clips provide the following advantages;

- Fast installation and ease of handling
- Panels are demountable for access to services behind
- Minimal 6mm build up between back of panel and substrate
- Panels can be installed and adjusted laterally and vertically
- Z-clips are hidden by the secured panel
- Z-clips are provided pre-drilled for quick and easy fixing to substrate

Finish	Panel Material	Max Panel Size	Application / Finish
Polished and textured plaster finishes	MDF	1500mm X 3000mm	Suitable for internal use only. An array of standard and custom finishes, ranging from natural Travertine stone, urban concrete or highly polished marble.
Sculptural®	Solid gypsum plaster	1800mm x 2400mm	Suitable for internal use only. 3D sculptural effects. Available in 20 standard designs, custom designs also possible.
ArmourCast External®	Cement/marble composite	1000mm x 2000mm	Suitable for internal/external use. Stone-effect finish available in a range of natural marble colours.
Lafarge Ductal®	Ultra High Performance Concrete	1500mm x 3000mm	Suitable for internal/external use. White and grey base offer a wide range of colours and can reproduce intricate design detail.

Maximum panel sizes are shown for illustration purposes only. Panel size will be dictated by project specification requirements
