

ARMOURCOAT®

SUSTAINABLE LUXURY FINISHES

SPECIFICATION SHEET

CAST PANELS - BAS RELIEF

Endless creative opportunities with the look and feel of solid stone.

Armourcoat bas-relief panels are totally bespoke, cast stone panels made by hand for your interior. Each panel is totally unique and made from a blend of high-grade gypsum, crushed marble and natural minerals to achieve the desired surface look and feel. The result is highly bespoke, hand carved designs that have the appearance and quality of solid stone.

There is huge creative scope for bas-relief panels, from intricately detailed nature scenes to strong geometric statement pieces. We work closely with designers and architects from the start of the project to ensure the design vision is brought to life exactly as intended.
