SUSTAINABLE LUXURY FINISHES

SPECIFICATION SHEET

CAST PANELS - CONCRETE EFFECT

The authentic look of cast concrete in an easily installed panel format.

Inspired by the brutalist aesthetic of raw cast concrete, Armourcoat concrete effect panels offer an authentic urban look and feel in easily installed, lightweight panels. Handmade from high grade gypsum and natural minerals, the surface of the panels embodies the characteristics of cast concrete down to the raw wood grain texture.

The surface of each panel is unique and varies very slightly to any other produced, giving an organic feel to the finished project. Armourcoat concrete effect panels are available in 800mmx800mm and 1200mmx800mm sizes. Panels are supplied ready to install with adhesive and can be easily cut on site.
