## Care & Maintenance Sheet 4 Armourcoat Sculptural

Armourcoat SCULPTURAL™ is a range of seamless sculptural wall surface designs. Armourcoat SCULPTURAL™ walls are constructed from a series of pre-cast panels that are bonded to the substrate. The panel joints are then filled and sanded and a final decoration is applied to the surface. Armourcoat SCULPTURAL™ panels are entirely mineral composition and are non-toxic, containing no VOCs or formaldehyde, and are completely non-combustible. The panels are extremely dense and hard with a smooth ceramic-like surface. Once the panels are installed each design can be finished in a range of decorative surface finishes. Some of the designs have been modelled in such a way as to enable the application of Armourcoat polished plaster finishes whilst other designs are more suited to a sprayed finish.

### 1 Cleaning Surface Dirt and Grime

Please consult the Care & Maintenance sheet for the chosen or specified finish (matt emulsion, Perlata or Spatulata).

### 2 Damaged Areas

Minor damage can be filled with a repair filler or Armourcoat Repair Pack. Fill the damaged area slightly proud of the surface and as the repair material hardens, scrape back any excess filler to leave the repair flush with the surface. Repeat this process a second time if necessary and then sand down smooth ready for re-decoration. For larger scale repairs please contact Armourcoat on the number below and arrange for us to do repair or: Ask us for your own maintenance and repair kit which is available for Selector Range finishes and includes tools, repair materials and instructions.
